

AGGÈRES
Flood solutions.

PORTA

Thanks to the PORTA, you never need to place sandbags at your front door again. This extremely lightweight and customised flood barrier protects your property against flooding. The side profiles (L-shaped) are little visible and allow easy and quick installation. The sides and bottom are provided with special rubbers, ensuring a watertight seal.

Applications

- › Securing door openings (both turning inwards and outwards)
- › Securing porches, windows, entrances, garage doors, ...
- › Suitable for listed buildings

Features

- › Available in different heights (max.1m) and widths (max.1,5m)
- › Polyester sandwich panel with composite frame
- › Only one panel per entrance (no modular flood barrier)
- › For large widths, a removable pillar can be provided
- › The Porta can be placed within or in front of the door opening
- › The system is DIY made and can easily be placed by a handyman

Benefits

- › Extremely light and easy to handle
- › Easy to store and install
- › Very rapidly deployable, placed within approx. 30 seconds
- › budget friendly

The coming decades are likely to see a higher flood risk in Europe. Global warming is projected to intensify the hydrological cycle and increase the magnitude and frequency of intense precipitation events in most parts of Europe. Between 1998 and 2009, floods in Europe have caused some 1.126 deaths, the displacement of about half a million people and at least €52 billion in insured economic losses. Aggères provides governments, industry and households with solutions that prevent floods from causing damage or limit their impact.
